

Guest / Shop Laundry Management System

Detachable Tags

Thanks to RealeX Management System, there are no more manual marking on garments, no Ink, and no more Heat sealed marking tags. These works are done without air compressor and no more consumables are required to mark. Detachable Tags can be used up to 300 times!

Out-sourcing

For Laundry outsourcing or operating in a central laundry, RealeX system gives you the total itemised quantity within seconds when the laundry picks up the soiled garments, using our Hand Held Mobile readers or Gate readers.

RealeX introduces the most comprehensive and user-friendly systems for managing Guest and Shop Laundry Operations, first time in the world. The system integrates the latest UHF RFID technology and provides information to manage the Laundry accurately

Benefits of the system

- Lesser staff - lower the operating expenses up to 12%.
- The System can monitor the entire operation with excellent reporting.
- No more customer compensation related to missing or mixing. Proper accounting system is included.
- Conventional marking costs up to 9 fils per garment. With our system the identification costs less than 2 fils with no more marking or shining.
- Initial investment is reasonable and the investment is paid back soon.

Photo-Capture

RealeX system capture pictures of each garment deposited by the customers in order to record the remarks like stain, damages and identification to avoid missing or mixing instances.

Sorting made easy

Manual or Auto Sorting - this can be done with Photo Proof and customer ID by the staff to confirm the quantity and Quality.
