Benefits:

Production - Up 7%   Purchases - Down 11% Labor & Administration Costs - Down up to 36%

We offer the most comprehensive and user-friendly systems for managing all aspects of Linen Operations. The system integrates the latest UHF RFID technology and provides information to mange the Linen Inventory 100% accurately and this will assist to lower operating expenses and further investment. Besides, we offer impeccable 24x7 support service too!

No more manual count - No mixing - Theft Control - Monitor staff productivity - Plan operation systematically - Set notifications for Management and Customers - Generate daily, weekly or monthly linen movement report & Laundry Invoice Automatically.

Save Time & Labor

Realex Laundry Management System counts Linen & Garments automatically by using our specialized RFID system. Large piles of linen can be processed simultaneously, reducing labor hours and eliminating human error.

Quality Reporting

Standardized reports help you track what was sent to the laundry, what was received from the laundry, and what items have not yet been returned. Realex RFID Manager features an intuitive User Interface that simplifies performing data queries and report generation.

Monitor Lifespan

Our system manages the entire linen inventory and the life span of each individual item from the date of its purchase. This will assist Management to monitor the usage, abuses, and damages etc., which will help them to maintain the stock as per planned occupancy levels. Our Quality RFID Tags have life span 300 wash cycles. They can be affixed to linen or garments with or without pouch.
