

## Uniform Laundry Management Systems

### Easy Monitoring

RealeX Uniform Management systems automatically monitors the inventory. The system eliminates manual tasks and human error. It can generate reports as per Management requirements.

### Auto or Manual Pick

RealeX Automated Uniforms-Pick Conveyor or the Manual stacking assists to deliver the Uniform within seconds as per employee ID. Both systems enable employees to pick up the cleaned Uniforms themselves (24 X 7), by swiping their cards or using their ID Number without presence of any laundry attendant.

### Superior RFID Tags

RealeX is proud to announce that our UHF RFID Tags' life span up to 300 wash cycles. The reading is more than 20% faster. They can be read up-to 950 pcs within seconds and the distance can be up to 16m. Tags can be heat sealed directly in to uniform or can be Detachable using our Pouch with your brand name and logo.

RealeX offers the most comprehensive and user-friendly systems for managing Uniform Laundry Operations. The system integrates the latest UHF RFID Technology and provides information to manage Uniforms accurately. This will assist in lowering operating costs. Besides, we offer impeccable 24x7 support service too!
